

High Line Outfitters

High Line Outfitters is a new innovative and fashion forward equestrian apparel and accessories company. High Line Outfitters will be introducing a complete and varied line of products designed to add new style to everyday riding with quality fabrics, fit, function, flair and fun for even the most demanding riders.

This new industry player has bridged the gap by bringing to market high energy clothes and accessories that'll keep your equestrian identity moving easily between riding and the rest of your busy life. All for a price that makes looking good affordable.

Our favorites amongst their first set of products are the cargo breeches. These breeches are available in a several hip colors with a cargo pocket sized to accommodate pesky articles like cell phones and positioned to be unobtrusive with a clearly contemporary style. Not only do we love the idea and the design, but the excellent 4-way stretch twill is still comfortable even after a full day in the saddle.

Their products are available only at www.highlineoutfitters.com beginning March 5. Mark your calendar or visit the site now and ask to be the first contacted when they open for business, but don't miss the chance to be one of the first to wear the new High Line Outfitters gear.

Connoisseur Equestrian Collection

Connoisseur Equestrian Collection introduces another color-coordinated riding wardrobe that appeals to the sophisticated, fashion-conscious rider. Polos and zip mocks coordinate with reversible quilted vest, reversible barn jacket, and a bonded fleece riding jacket, that can be combined in many ways to create a versatile wardrobe. Matching saddle pad completes the outfit.

The outfits not only look good, but also feel great – from the exclusive cotton based moisture balance fabric, brushed on the inside for extra softness, to the hay repellent bonded fleece jacket. Color combinations are royal/light blue and black/magenta.

Prices range from \$49 to \$199.

Horse & Rider Treats

Cindy Maril, President of Horse & Rider Treats was inspired by Floyd, her Oldenburg gelding, to develop Horse & Rider Treats. Cindy and her husband Steve were putting long hours into developing their baked goods for health food stores when the idea came to her - make healthy treats that humans can share with their animals!

These healthy and organic horse treats are enjoyable for you, your horse, and your dog! Made with Horse & Rider favorite ingredients, pumpkin, apple, carrot, as well as flax seed and oatmeal. These treats are FDA approved and a good source for ALA Omega 3. They are egg free, dairy free, all natural, no hydrogenated oil, and no trans fatty acids. Yes, they're Vegan and Kosher!

We have been eating these treats in the HC offices and I'm afraid there won't be any left for our horses, they are that tasty! We share many things with our horses and now we can share snack time with them as well.
